REVOLUTION ROBOTICS
powered by STEAM ACADEMY

Playfully Brilliant™ Afterschool Robotics Program

In partnership with **Revolution Robotics**, our school is offering a hands-on program where kids dive into story-driven missions, explore science and engineering, and learn to think like problem-solvers. All wrapped in play. All happening right here after school.

From Curiosity to Capability

With **Revolution Robotics**, kids **imagine**, **build**, **test**, and try again. They explore how things work, then figure out how to make them work better. Powered by science, creativity, and problem-solving, each session helps kids grow the skills that matter—confidence, resilience, and the drive to keep exploring.

Stories That Inspire

The best learning experiences don't feel like learning—they feel like an adventure. That's why **Revolution Robotics** drops students into a dynamic comic universe where the characters' challenges inspire your child to become the hero of their own learning journey.

Today's Fun, Tomorrow's Skills

Revolution Robotics makes space for **creativity**, **teamwork**, and hands-on **problem-solving**, all through stories and challenges kids actually want to engage with. From **coding** sensors to **gearing up robots**, kids turn imagination into invention. With every challenge, they build, test, and explore—learning by doing, and loving every second of it.

50,000+ Hours of hands-on learning delivered

13,000+ Children inspired

450+ Participating schools

10+ Years of STEAM-focused innovation

STEM.ORG ACCREDITED EDUCATIONAL EXPERIENCE

"My son is attending **Revolution Robotics** lessons every week and he can't wait for the next one. He's more engaged, more confident, and he's even made new friends in the class."

-Deva L., parent of a 9-year-old
